Received 15 December 2002, accepted 30 December 2002

SUMMARY

PHILLIPS, C.M. 2002. Publications and theses on Antarctic and sub-Antarctic birds, 2000. *Marine Ornithology* 30: 71–76.

A total of 183 scientific publications and theses on Antarctic and sub-Antarctic birds for 2000 is listed by author. This annual list is produced on behalf of the Group of Experts on Birds of the Scientific Committee on Antarctic Research (SCAR) Life Sciences Standing Scientific Group (formerly the Bird Biology Subcommittee of the SCAR Working Group on Biology) as a service to marine ornithologists.

INTRODUCTION

In 1986, the then Bird Biology Subcommittee of the Scientific Committee on Antarctic Research (SCAR) Working Group on Biology recommended that a list of recent publications on Antarctic and sub-Antarctic seabirds species from 1986 be prepared.

The 2000 list, the fifteenth to be produced and published in *Marine Ornithology*, has been compiled by scanning the relevant literature and abstracting services, and by correspondence with members of the subcommittee. Readers are requested to send reprints of their recent relevant literature, including ones missing from this or previous lists, to the author for inclusion in subsequent lists.
