

# MARINE ORNITHOLOGY

*Marine Ornithology* is published by the Pacific Seabird Group, on behalf of the African, Australasian, Dutch and Japanese Seabird Groups. The journal provides an international outlet for publications relating to marine birds, extending its reach and accessibility by appearing free on the World Wide Web in a form that can be downloaded and printed in the same style as the hardcopy document. The print version is available for both individual and institutional subscribers.

Please refer to [www.MarineOrnithology.org](http://www.MarineOrnithology.org) for current subscription rates, forms, and payment instructions.

Remittances for all institutional and individual subscriptions to the print version of *Marine Ornithology* should be sent to:

*Marine Ornithology* publishes papers relating to the biology and conservation of birds associated with the marine environment—behaviour, biogeography, ecology, evolution, genetics, physiology, and systematics. Papers are especially invited on topics relating to the special adaptations of marine birds, the relationship between seabirds and oceanography, and seabird–fisheries interactions. Papers will be accepted on their merits as either pure science (advancement of knowledge) or conservation (advancement of seabird conservation), including issues relating to public policy and legislation. Normal academic publishing policy is followed with respect to authorship, originality, and sole publication. Everything that appears in the printed journal also appears on the website. In addition, papers using video, sound clips, or other non-print media can be submitted for publication on the web only.

Contributions may be submitted in any of the following formats:

**Papers:** reports of research results or conservation action of any length.

**Review Articles:** major papers reviewing an area of marine bird science or conservation that achieve a new synthesis of existing information.

**Status Reports:** comprehensive reviews of seabird population status for species and geographical regions.

**Forum Articles:** short papers on topics of general interest that express a particular viewpoint, report new hypotheses relating to marine bird science or conservation, or report biological or physical processes relevant to marine birds that were hitherto little known or ignored by marine ornithologists.

**Commentaries:** short articles contributing new perspectives on existing publications.

**Reviews of books, websites, and software:** user reviews of new material that is relevant to the field.

**For general information about the journal, please contact the Managing Editor:**

Louise Blight  
([marine.ornithology.manager@gmail.com](mailto:marine.ornithology.manager@gmail.com))

**All material, except book reviews, should be submitted to the Editor in Chief:**

David Ainley  
HT Harvey & Associates  
983 University Avenue, Building D  
Los Gatos, California 95032, USA  
([marine.ornithology.editor@gmail.com](mailto:marine.ornithology.editor@gmail.com))

**Book reviews, along with books, monographs, and proceedings for review, should be sent to the Book Review Editors:**

Eric Wagner  
([erlwagne@gmail.com](mailto:erlwagne@gmail.com))

Rachel Buxton  
Geomatics and Landscape Ecology Research Lab
