

MARINE ORNITHOLOGY

Marine Ornithology is an open-access journal published by the Pacific Seabird Group on behalf of the African, Australasian, Dutch, and Japanese Seabird Groups. The journal provides an international platform for research on marine birds, with a focus on their biology, ecology, and conservation.

Now published exclusively online, *Marine Ornithology* is freely accessible at www.marineornithology.org, where articles can be viewed, downloaded, and printed in a consistent format. We publish papers relating to the biology and conservation of birds associated with the marine environment, including behaviour, biogeography, ecology, evolution, genetics, physiology, systematics, and the unique adaptations of marine birds. Studies on seabird–oceanographic relationships, seabird–fisheries interactions, and the implications of public policy or legislation for seabird conservation are particularly encouraged. Papers are evaluated on their scientific and/or conservation value and must meet standard academic criteria for originality, authorship, and publication ethics. In addition to traditional articles, we support the inclusion of multimedia content (e.g., video or audio) published on the website.

Submissions may be any of the following:

Review articles: major papers reviewing an area of marine bird science or conservation that achieve a new synthesis of existing information;

Papers: reports of research results or conservation action of any length;

Status reports: comprehensive reviews of seabird population status for species and geographical regions;

Forum articles: short papers commenting on material carried by the journal, reporting new hypotheses relating to marine bird science or conservation, or reporting biological or physical processes relevant to marine birds that were hitherto little known or ignored by marine ornithologists.

General queries relating to *Marine Ornithology* should be directed to:

Natasha Gillies, Managing Editor
(marine.ornithology.manager@gmail.com)

All material for publication, except book reviews, should be submitted to:

David Ainley, Editor-in-Chief
(marine.ornithology.editor@gmail.com)

Book reviews, along with books, monographs, and proceedings for review, should be sent to:

Eric Wagner, Book Review Editor
(erlwagne@gmail.com)
